Let's keep in touch!

euWater4i-SD has caught your attention and you would like to stay up to date on our future activities? Then fill in the form to receive our newsletter and so we can contact you every time an interesting event / training / trade mission / matchmaking / funding / any relevant information comes up.

European Water-smart initiative for
fostering International Sustainable Development

Co-funded by
the European Union

euWater4i-SD

is a European project that provides you all the necessary tools to boost your internationalisation in Eastern Africa and Latin America.

Need information?

We do market intelligence to ensure that you have all the knowledge on the countries you are targeting and that you can access them easily.

Need competences?

We offer training, advice and coaching from experts, so that you have every chance of success in your internationalisation.

Need network?

We organise trade missions, B2B meetings and matchmaking events in order for you to meet future partners and customers.

Need capital?

We help you to find public and private financial opportunities at local, national and European level.

euWater4i-SD
supports you going
international in Latin
American and Eastern
African countries

Find new business opportunities and boost your competitiveness by going international

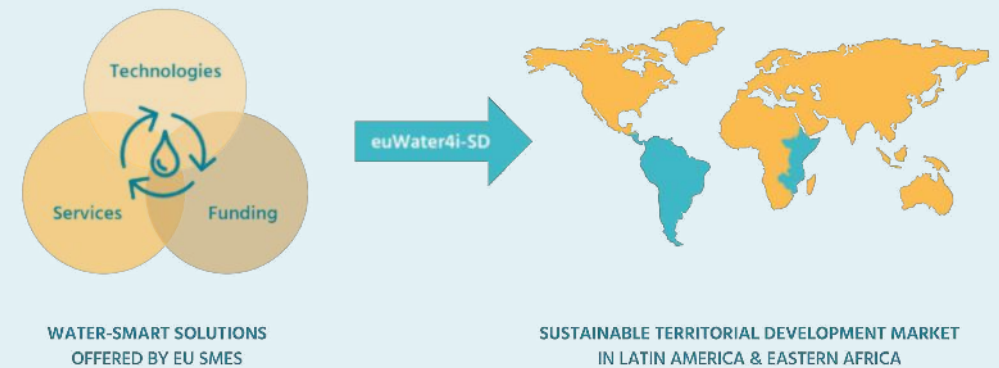

Discover the many opportunities of the sustainable territorial development market! It covers the following key sectors:

-  construction
-  energy as a service
-  agriculture
-  industries
-  water resources management and supply

Their common characteristic is that they all rely on adequate water quantity and quality and are therefore under pressure because of increasing demand, pollution and climate change. It is especially true in emerging countries where the water technologies, services and infrastructures are not yet well developed. There is a need for them to rely on adequate expertise and solutions, and this is something that you can offer through your water-smart solutions.

Work with us on a sustainable world and a better future! Share your expertise with emerging countries and enable environmental and energy transitions. We want to achieve a resource-efficient society and implement a circular economy.

Join our network and participate to the building of new value chains for international markets
